SUMMARY

I'm a Senior Experience Designer in Sydney with 5+ years' experience across banking, insurance and e-commerce. I design complex lending journeys at Westpac and build reusable AI workflows for design teams.

EDUCATION

University of Adelaide · Trilogy Education
UX/UI Bootcamp
2020–2021

Macquarie University
Bachelor of Global Business
2017–2020

SKILLS

Product design
- End-to-end experience design
- Interaction design and prototyping
- Design systems and accessibility
- Journey mapping and information architecture

Research and optimisation
- Discovery and workshop facilitation
- User research and usability testing
- Behavioural analytics and A/B testing

Design leadership and AI
- Stakeholder alignment and cross-functional delivery
- Reusable AI workflows and agent prototyping
- Design storytelling and research synthesis

TOOLS

Figma, Miro, Google Analytics, Tealeaf, Adobe Creative Suite, AMP and Microsoft Copilot.

EXPERIENCE

Senior Experience Designer

Westpac · Business & Wealth · Jun 2026 – Present

- Own design for the BizEdge credit memo and an integration in development that brings together two additional systems. Shape workflows with bankers, credit managers, product, engineering and risk partners.
- Prototype AI-assisted design workflows in AMP and Copilot, using reusable skills with defined inputs and outputs for reverse briefs, research synthesis and testing plans. Explore how Figma integrations and Miro AI can support those workflows.
- Built an AI-assisted workflow for presentation storytelling and slide creation that colleagues now use.
- Developed a concept for conversational AI to recommend industry classification (ANZSIC) codes to bankers, following a 2024–2026 review that found 15% of selected codes were incorrect.

Product Designer

Insurance Australia Group (NRMA) · Jun 2022 – Jun 2026

- Cut time to quote by approximately 50% in the Building Only flow and increased selection of higher-value cover by 75% compared with the legacy experience by leading the redesign of NRMA's Home Insurance Quote & Buy journey.
- Identified where customers struggled with sum insured through interviews, usability testing and behavioural analytics, then used the findings to simplify the quote journey and guide experimentation.
- Improved design consistency through reusable components and clearer information architecture. Partnered with product, engineering, analytics and underwriting to prioritise changes and share findings across the portfolio.

UX/UI Designer

Best & Less · 2021–2022

- Designed end-to-end e-commerce journeys, using customer research and rapid prototyping to improve usability and working with product and engineering to balance commercial, brand and accessibility requirements.
- Established UX workflows, prototyping standards and design guidelines to clarify handover.
